Company Description

IFP, Inc. (Innovative Food Processors) takes pride in 30+ years of collaboration and partnership with leading global food, dietary supplement, sports nutrition, and medical food companies. We offer commercialization, turnkey manufacturing, specialty ingredients and expertise in every stage of the powder product development process.

IFP's two manufacturing plants are located in Faribault and Hayfield, Minnesota and offer a one-stop solution for your powder product and specialty ingredient needs. With a manufacturing site of more than 150,000 square feet, we're equipped to produce the highest quality powders using the most advanced powder processing technology available.

We are recognized for our customized product and process development capability and comprehensive manufacturing capacity. This approach makes it a one-stop shop from innovation through the execution stages of food and nutrition powder products. We strive to deliver the perfect powder product.
