## Specialized Services

- Highly experienced R&D team works closely with customers to develop custom ingredient manufacturing processes as well as innovative, proprietary blends and finished dosage formulations.
- Collaborative efforts with research institutions and medical advisors enables TSI to strategically partner with companies in developing trend setting innovative products.
- Medical Advisory Board critiques new active ingredients for propriety, safety, clinically-proven efficacy and global marketability.
- Extensive in-house ingredient and finished dosage manufacturing capabilities as well as blending and granulation capabilities.
- Quality, regulatory compliance and customer/brand security are guaranteed as all products are tested in-house at our state-of-the-art GLP laboratory (as certified by Australia's TGA and Ireland's IMB).
- Consistent and dependable service provided by TSI sales offices located in the United States, Europe, Australia, Japan and China.
- TSI provides reliable logistics and warehousing worldwide.
