Dr. S.K. Dash

Company Description

UAS Laboratories Inc., a leading probiotic company, was founded by Dr. S.K. Dash in 1979. The company manufactures and markets probiotics with the super strain DDS-1 and antioxidants in the United States, Canada, and many other countries worldwide. UAS offers finished products, raw materials, private labeling and custom manufacturing.

Dr. Dash became interested in probiotics while working as the director of the Food and Drug Administration for South Dakota from 1973-1979. He found that studies showed probiotics were 97% effective in treating E. coli infections in pigs, an efficacy rate equal to the antibiotics then being used. Building on this research, he started his own company and began to develop probiotics for human use. He also introduced quality control standards to the industry and became the chairman of the National Probiotics Products Committee because of his expertise in probiotics and concerns about the honesty in labeling and quality control.

Key Personnel

Dr. S.K. Dash
President

Dr. Lawrence Hobermann
